

Calibration pose 1:

Make an 'L' between your fingers and thumb, rotate your thumb to the front. Ensure your fingers are together.

Calibration Pose 2:

Keep your thumb in the same position and spread your fingers.

Calibration Pose 3:

Close your fingers. Then close your hand.

Calibration Pose 4:

Bend your PIP joints so that your fingertips touch where your palm and your fingers meet.

Calibration Pose 5:

Fully extend your distal joints. Same as Calibration Pose 3.
